Dukaversum

a universe of possibilities

Step into the world of Duka

We consider ourselves as an interface between architecture, design and technology and set new impulses. Duka offers exclusive shower enclosures in a timeless elegant design language. Our slogan "The shower enclosure" forms the core of our corporate attitude: every Duka is unique and specially adapted to your wishes and requirements. High-quality raw materials combined with innovative technology and exceptional design are the hallmarks of our products. With great enthusiasm, we develop shower enclosures that represent the combination of comfort and versatility, lightness and resistance, luxury and lifestyle. That's why you don't just get an everyday object from us, but **The Shower Enclosure.**

South Tyrolean roots

We are a South Tyrolean company with strong ties to the tradition and way of life of this land. The geographical position between north and south has shaped our values: Reliability, quality consciousness and willingness to perform combined with creativity, flexibility and sustainability. In 1979 we started as a one-man company in a garage in South Tyrol. Today we are a family business with more than 300 employees. Thanks to quality, ease of assembly and individual solutions, we have been able to steadily expand our production and win new markets.

We care about tomorrow

For Duka, sustainable production and respect for the environment go hand in hand. We focus on quality as well as sustainable economic and working methods along the entire supply chain. That is why we source our materials from the nearest area, manufacture our products in South Tyrol and ensure that we use our resources responsibly.

Duka - a company with character.

Ein Unternehmen aus
südtirol

Duka Design

We have always placed great emphasis on the development and realisation of shower enclosures for every need and taste. This ambition has not gone unnoticed. As a result, our products have won several awards in the areas of innovation and design. Awards such as the Red Dot Design Award, reserved for the most innovative products in the design sector.

What are the benefits for you as a customer ? For Duka, international awards are both a confirmation and an incentive for our daily work. Therefore we continue to do our utmost to design and manufacture unique gems for your bathroom, to make the modern architectural language of our models tangible

Duka - every detail counts!
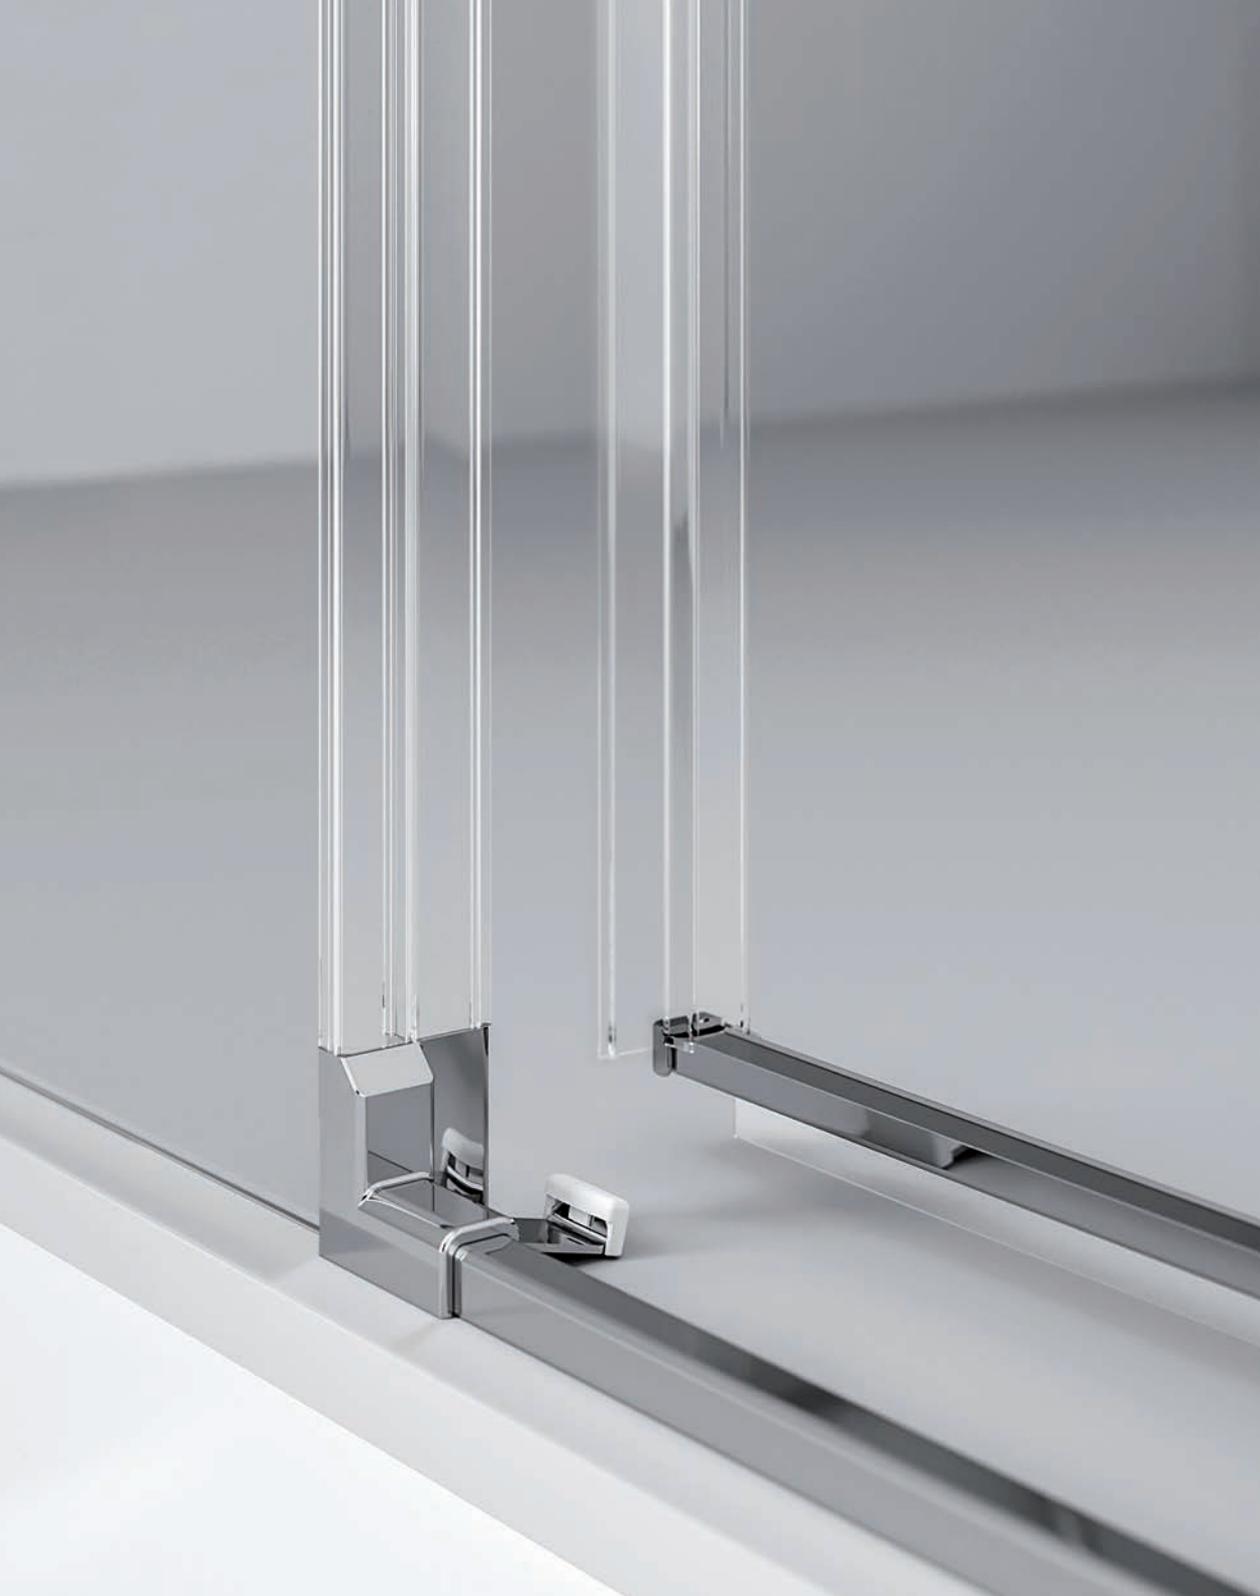

Duka quality

Quality is our claim – related to ourselves, our products and our partners. Our high quality standards are also reflected in our choice of raw materials. We source both our high-quality glass and aluminium in the closest proximity. The tempered safety glass is produced in our own glassworks near Venice, the cradle of European glass manufacturing. Our aluminium profiles made of special alloys are sourced from an Austrian expert in this field. In our in-house metal processing department, all fittings, hinges and handles are manufactured on high-precision CNC machines.

Duka - a little better every day!

Tailor-made solutions

As a specialist in tailor-made solutions, we are able to fulfil almost any wish. Years of experience are the basis for customised solutions without sacrificing aesthetics and practicality. Forewalls, roof slopes, cut-outs, sloping walls or floor drops - Duka manufactures shower enclosures to fit your bathroom. This means that even larger tolerances on site can be compensated easily, quickly and professionally. It goes without saying, that we deliver our custom-made products in the shortest time possible, something for which we have already received awards.

Duka - your tailor-made specialist!

acqua 5000
pura 5000

acqua 5000

TIMELESS ELEGANCE

8 mm Glass thickness | **2000 mm** Standard height
With acqua 5000, Duka have realised their goal of creating a frameless sliding door. Shining aluminium meets the weightless clarity of glass. Eye-catching form and aesthetics outfit come together to create a unique atmosphere in your bathroom. As a corner or niche, acqua 5000 is available in almost all dimensions.

Product details acqua 5000

1 - Adhesive technology:
This icon indicates items where the hinges and fasteners are bonded to the glass with the tried-and-tested Duka® UV adhesive technique.

2 - Wall adjustment by means of an adjustable safety glass. The width adjustment is a design element. The wall adjustment of 25 mm at the side and fixed panels are guaranteed by the "inside the wall profile stepless adjustable tempered glass".The glass is inserted and connected by means of adjusting screws to the wall profile. The adjusting screws allow easy adjustment of the fixed part within a range of 25 mm. The cover is clipped to the outer side. Regardless of the adjustment position, the outer view of the profile remains unchanged.

3 - Automatic Close & Stop:
The glass doors glide gently over the last few inches into "open" or "closed" position - a bonus for any bathroom. The innovative A/C system is available as an optional for all acqua models.

4 - Sliding panels with swivel-release mechanism:
Lower runner guide – by pressing lightly on the runner guide, the sliding panel can be quickly released for ease of cleaning, even between the panels.

5 - New, innovative stability:
it does what it promises: Corner entry in large showers with no ceiling attachment! Our unique solutions are designed to impress!

Product details pura 5000

1 - Adhesive technology: Strict controls during our manufacturing process guarantees long product life and lasting adhesion. Our innovative UV process ensures absolute safety.

2- The drip profile: is barely visible from the outside, yet offers optimum splash protection.

Product details pura 5000 Wall profile models

1 - Adjustment options:
Wall mounting profile with innovative adjustment mechanism for fixed panels and side walls.

2 - Adjustment options:
Wall mounting profile, minimalist design with all the benefits of adjustability and concealed screw fastenings

Product details pura 5000 Frameless models

1 - Design:
The discreet silk screen print, in the same colour as the hinge and handle, conceals internal wall mountings.

2 - Handle design:
The aluminium handle has been ergonomically designed for a comfortable, safe grip both inside and outside the enclosure.

ColourArt

The ColourArt introduction now **brings colour into the bathroom** and makes the hinges and handles even more contemporary. The hinges and handles available in five new finishes – metal brushed copper, metal brushed brass and metal brushed black (PVD coating, Physical Vapor Deposition, which ensures abrasion, scratch and corrosion resistance), metal matt white, metal matt black (lacquered aluminium) – make it possible to create **different and original sets** for a very personal shower experience.

The profiles of the shower enclosure are in silver high polish and now also in Stainless Steel Look available. On the models without profile there is a short silk screen print on the glass that matches the colour of the hinges and handles.

CSH | Chrome / Silver High Polish

↔ 700 - 900 mm

Product details multi-S 4000

1 - Sleek shapes: the cylindrical tubular hinge has been reduced to a minimum, allowing the transparency of the glass to take centre stage. Minimalistic in appearance, great in functionality: the proven "auto close" closing system allows the pivot elements to engage exactly where required.

2 - Visual Harmony: the support bar is transformed in appearance by wrapping around the glass and the wall with a strength that exudes security and with no screws in sight. In addition, the bar is flush with the height of the cabin, so tiling at shower cabin height is not an obstruction to a simple and an easy installation.

3 - Lightness and harmony: the hinge now takes on a new, more fluid form in harmony with the soft lines of the model. This element, with its minimal and light design, retains its intrinsic functionality, but now does so with amplified beauty. The hinge allows a 180° outward opening.

4 - Shiny aluminium accents: the magnetic strip disappears discreetly inside the shut-off profiles, leaving only the shine of the aluminium visible. This improves the aesthetics of the cabin without restricting its functionality. The extremely thin layer of aluminium over the magnet ensures a high level of effectiveness.

Product details multi-S 4000

1 - The new aluminum standard knob handle becomes an eye-catcher. The distinctive character of this handle renews itself, aligning with the modern spirit-of-the-times and providing new tactile experiences. Its flattering structure accompanies the handle with unparalleled naturalness, adding a touch of class to the shower enclosure.

2 - The optional handle with its classic shape embodies timeless elegance. The square shape and the recessed grip offer a comfortable and stable grip.

3 - With its special shape, the standard handle for folding pendant solutions focuses not only on modern design, but also on ergonomics. The Soft-Grip inlay echoes the haptic structure of the knob handle and thus contributes to an even better grip and a timeless and unmistakable design.

Product details natura 4000 - sliding systems

1 - Magnetized, releasable sliding elements - The symbiosis of the protection strip and the new, efficient easy-care seal allows a maximum splash protection. The lower runner system conceals a typical Duka-innovation: with the assistance of magnetic support the door glides sturdily and calmly on a guiding hook, which can be released in order to clean the door.

2 - Automatic Close & Stop (ACS) / Automatic Close (AC):
The sliding door glides smoothly along the runner to the "open" or "closed" position (ACS). Also available with Automatic Close (AC) only. Either one of these innovative systems can be ordered as an optional.

3 - Sliding systems:
The fixed panels of the corner entry model are available with or without a horizontal profile.

4 - Girofix:
Wall attachment with the new, improved girofix system: quick, easy and convenient.

Product details natura 4000 - pivot, swing and bi-fold doors

1 - Hinge:
The intelligent hinge of the bi-fold pivot door with a 180° opening, is fitted with an AC-mechanism.

2 - Design:
the design of the hinge with its offset pivot makes this model particularly flexible. It can be adjusted to adapt to external obstructions (e.g. towel warmers) or internal (mixers or taps) without foregoing wide entrance space and transparency of the surface.

3 - Mounting:
The wall attachment profile compensates perfectly by means of its innovative, telescopic adjustment mechanism.

4 - Adhesive technology:
The hinges are attached directly to the glass by means of the tried-and-tested Duka UV adhesive technology. The result: completely smooth inner surface of the glass for outstanding beauty and ease of cleaning.

natura 4000 -
Colour Up Your Life

The popular natura 4000 model series is becoming even more desirable. It is available in three new, trendy colours: copper pearl, brass pearl and black pearl. The Pearl-colours are available for our products natura 4000, libero 4000 (freestanding doors only) and libero 3000. Depending on the incidence of light, the colours of the new surfaces change shades. The special luminosity and brilliance of these colours give the products a warm radiance and thus a noble and pleasant aura. Whichever solution you choose, with the endless possibilities for combination and customisation, you can give your bathroom just the look you want.

COP | copper pearl
The colour copper adds a classic charm to the room.

BRP | brass pearl
The colour brass conveys sophistication and luxury

BLP | black pearl
Black creates a pleasant and friendly ambience

Product details gallery 3000

1 - UV adhesive technology – brilliant:
The hinges are attached directly to the glass by means of the tried-and-tested Duka UV adhesive technology. The inner surface of the glass is completely smooth, giving you both clear, uncluttered beauty and outstanding ease of cleaning.

2 - Horizontal support:
The horizontal support bars are, likewise, in complete aesthetic harmony with the linear features of the handle and profiles, and play their own part in enhancing the elegance of your shower enclosure. The minimum width of 11 mm guarantees absolute stability with minimum visual impact.

3 - 180° hinges:
The 90° bi-directional opening ensures easy access to the shower, even in smaller bathrooms. **Adjustable Automatic Close System:** With the tried-and-tested Automatic Close System, the doors glide smoothly along the last few centimetres and draw gently into the closed position.

4 - Magnetic aluminium profile:
A thin, aluminium profile with a magnetic insert is affixed to the vertical edge of the glass. The aluminium profile is calibrated to hold fast to the glass without adhesives, and keeps the magnet firmly in place when the door is in movement or during cleaning.

Product details gallery 3000

5 - Handle:

The handle is the result of practicality blended with ergonomic performance and design, and has been precision-designed to match the functional and aesthetic features of the door itself; the shape is in perfect harmony with the regular geometric lines of the enclosure. The rubber element within the handle in the inner side of the door ensures top functionality, particularly when in contact with water. For doors without a fixed frame component, the outer side of the handle is fitted with a buffer to protect the door, wall and furnishings in case of contact.

6 - The attractive towel rail combines beautifully with the elegance of the design.

7 - The 4★ seal system:

The seal system has also been integrated into the gallery 3000 for even greater ease of cleaning and maintenance. The 4 ★ seal system is fitted to the base of the glass panelling as a discreet aluminium profile together with a PVC seal insert. The inner deflector and soft flaps of the seal strip keep the water firmly in check. The seal strip can be removed quickly and easily for cleaning or replacement.

dukessa 3000

DESIGNED FOR THE SAKE OF YOUR PLEASURE

3 mm Glass thickness | **1900 mm** Standard height
Our model series dukessa 3000, in real or synthetic glass, reflects our quality consciousness. The result is a harmonious, uncompromising product that guarantees unparalleled joy in showering, every single day.

Product details dukessa 3000

1 - Telescopic screw:
The advanced techno-logy of our adjustable wall mounting profiles by means of telescopic screw not only guarantees secure closure on sloping walls, but also simplifies assem-bly considerably and elim-inates visible screw fasten-ings.

2 - Girofix:
The innovation in as-sembly: the "girofix" attachment system for corner entrances. This technique sim-plifies installation and eliminates visible screw fastenings.

3 - Runners:
Consistent use of main-tenance-free ball bearing technology and intelligent runner technology with concave wheels allows for outstanding ease of use and an ultra-smooth glide. They can be infinitely ad-justed, guaranteeing per-fect sliding and closing of the door.

4 - Swivel-release mechanism:
The individual sliding panels can be infinitely adjusted, thus guaranteeing perfect sliding and closing of the door. They can also be swung out for ease of cleaning.

Product details vela 2000

1 - Design:
The doors open inwards as well as outwards and provide maximum space, even in smaller showers.

2 - Support:
The adjustable support connecting the fixed panel and side wall is stable and easy to install.

3 - Design:
The linear integrated handle with magnetic closure and the use of high-quality materials distinguish the vela 2000.

4 - Design:
In addition to the raise/lower mechanism, the closure point of the movable panel can also be adjusted by selecting the locking point.

stila 2000

THE DESIGN OF EVERYDAY THINGS

6 mm Glass thickness | **1950 mm** Standard height
The design of the new stila 2000 impresses with its clarity, simplicity and contemporary feel. Consistent lines, harmonious and balanced to the last detail, bring the modern architectural language of these models to life. The range of the already versatile stila 2000 model series has been extended to include the colour black.

1 - Recessed hinge technique: Items with this marking have hinges, which are screwed to the glass, nevertheless remains the glass smooth on the inside: the glass surface and hinge are in line on the inside of the shower enclosure.

2 - Additional handle: Folding doors feature an additional handle between the folding panels, inside and outside, for easier opening of the doors.

Product details stila 2000

3 - Without lower horizontal profile: The latest version of stila 2000 models without lower horizontal profiles rounds off the product portfolio and meets all architectural requirements for the modern bathroom. In updating our design we have also enhanced the practical features of this shower enclosure, which now features a simplified entrance, ease of cleaning and improved releasable sliding elements.

4 - Runners: The runners can be easily adjusted to ensure a perfect function - time after time.

5 - Up and down mechanism: The pivot and bi-fold models feature an infinitely adjustable raise/lower mechanism for precision setting of the 90° open and closed position of the doors.

6 - Swivel release mechanism: Its winningly simple design features a release mechanism integrated into the outer side. When activated, the doors swivel freely, allowing for remarkable ease of cleaning.

Product-details prima 2000 - for articles with code 6A
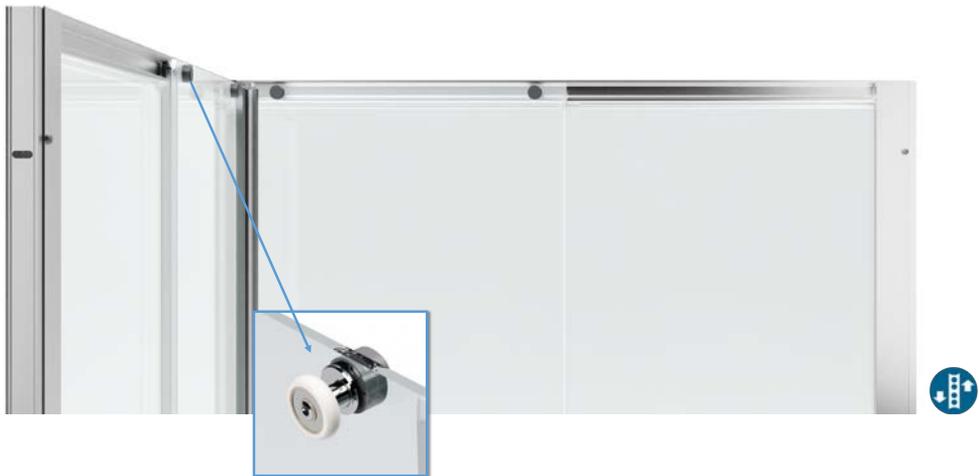

1 - Releasable sliding elements: Shower enclosures with releasable sliding elements are marked with this symbol. Your advantage: easy cleaning, also between the glass panels!

2 - Rollers: the ball-bearing rollers offer a height adjustment of ± 2.5 mm, ensuring perfect door alignment at all times.

3 - Adjustment range: by combining a 30 mm adjustment range on the enclosure with a 36 mm widening profile, any width can be supplied from stock.

4 - Minimalist design: the solid running track, with a height of just 35.5 mm, perfectly complements the product.

1 - Elegant magnetic handle strip in high-quality aluminium:

- fine adjustment for perfect closing of the door
- the high-quality aluminum prevents "yellowing", offers a comfortable grip, and allows for easy cleaning of the glass
- with its linear and elegant design, the handle profile creates a minimalist aesthetic while ensuring maximum accessibility – 'form follows function'
- maximum glass transparency

2 - Up and down mechanism: Doors with this up and down mechanism are raised automatically by a few mm when opened. The vertical sealing is protected from prolonged abrasion and the door closes, the last 15 mm by itself.

Product details prima 2000 - for the remaining articles

1 - Design: Smooth-running, height-adjustable door panels offer many years of perfect function.

2 - Adjustment options: The pivot and bi-folding doors can be opened inwards and outwards. In addition to the raise/lower mechanism, the closure point of the movable panel can also be adjusted by selecting the locking point.

3 - Runners: All articles bearing this icon feature sliding elements with height-adjustable rollers, guaranteeing optimal adjustment options for perfect sliding and closing of the doors.

4 - Releasable sliding elements: Shower enclosures bearing this icon feature sliding doors with individual panels which can be released and moved independently of each other. This greatly simplifies cleaning of the overlapping parts of the doors.

1 - Automatic Close & Stop:
The glass doors glide gently over the last few inches into "open" or "closed" position - a bonus for any bathroom.

2 - Sliding panels with swivel-release mechanism:
Lower runner guide – by pressing lightly on the runner guide, the sliding panel can be quickly released for ease of cleaning, even between the panels.

3 - The 5-star seal system:
The discreet aluminium profile is attached flush to the base of the glass with no protrusion, cutting potential dirt residue to a minimum. The PVC seal insert (similarly, with no protrusion) features an inner deflector and soft, downward-angled PVC flaps.

Product details libero 4000

1 - Sleek shapes: the cylindrical tubular hinge has been reduced to a minimum, allowing the transparency of the glass to take centre stage. Minimalistic in appearance, great in functionality: the proven „auto close" closing system allows the pivot elements to engage exactly where required.

2 - The support bar is transformed in appearance by wrapping around the glass and the wall with a strength that exudes security and with no screws in sight. In addition, the bar is flush with the height of the cabin, so tiling at shower cabin height is not an obstruction to a simple and an easy installation.

1 - Magnetized, releasable sliding elements - The symbiosis of the protection strip and the new, efficient easy-care seal allows a maximum splash protection. The lower runner system conceals a typical Duka-innovation: with the assistance of magnetic support the door glides sturdily and calmly on a guiding hook, which can be released in order to clean the door.

2 - Sliding elements with height-adjustable rollers guarantee optimal adjustment options for perfect sliding and closing of the doors.

3 - Automatic Close & Stop: The glass doors glide gently over the last few inches into "open" or "closed" position - a bonus for any bathroom. The innovative A/C system is available as an optional for all acqua models.

Détails du produit libero 3000

1 - Hinges: the hinges are bonded to the glass by means of the proven Duka UV bonding technique. The inner surfaces of the glass thus remain intact, smooth, for easy cleaning and clutter-free viewing. (6GTF2P L/R)

2 - Design: The silk screen is available in 6 or 8 squares, always and only in black, in both 6 and 8 mm thick glass, enclosed within aluminium profiles also in black, in a perfect match. The profiles guarantee both stability and durability, protecting the silk screen itself (6/8GW2F L/R).

Product details

1 - 180° hinge:
The 180°-swinging hinge allows the screen to be folded back from the edge of the bath tub, thus enabling easy cleaning of the inner surfaces without having to step into the tub.

2 - Mounting: The advanced technology of our adjustable wall mounting profiles by means of a telescopic screw guarantees perfect compensation.

3 - Girofix:
The innovation in assembly: the "girofix" attachment system for corner entrances. This technique simplifies installation and eliminates visible screw fastenings.

4 - Fine thread mechanism:
The entire door can be easily adjusted within the preset range by means of a fine thread mechanism with setting wheel. This means that adjustment is possible even after years.

The highlights

Our symbols, **the Duka icons,** stand for the high quality and the safety standards of our shower enclosures, whose compliance is ensured through regular monitoring. Designed as quality features, they serve as a guide and allow for easy, immediate reference to the technical specifications in the Duka price list, Duka training materials and digital presentations. The individual symbols represent the various technical features and reflect the technical expertise of Duka.

Automatic Close & Stop

The glass doors glide smoothly along the last few centimetres into the closed or open position.
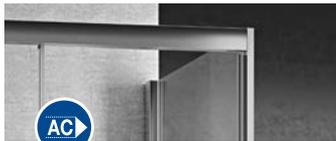

Automatic Close

Articles marked with this icon feature AC automatic close system for the "closed" position only.

Adhesive technology

This icon indicates items where the hinges and fasteners are bonded to the glass with the tried-and-tested Duka® UV adhesive technique.

"Brilliant" adhesive technology

This icon indicates items where the hinges and fasteners are glued to the glass with the new innovative Duka – brilliant UV adhesive technique.

Recessed hinge technique

Items with this icon feature hinges which are bonded to the glass with the Duka® UV adhesive system for an ultra-smooth surface.

180° hinge

The 180° hinge guarantees absolute flexibility and comfort: the shower enclosure can be opened fully towards both inside and out.

180° hinge with Automatic Close

This icon indicates items with an automatic close system - just a simple touch and the doors glide smoothly through to the closed position.

Raise/lower mechanism

Doors with this mechanism automatically rise by a few mm when opened.

Adjustable raise/lower mechanism: In addition to the raise/lower mechanism, the closure point of the movable panel can also be adjusted by selecting the locking point.

Closed slide profiles
Closed slide profiles: articles with this symbol discreetly conceal the slide technology inside the profiles, leaving only clean, elegant surfaces in view.

Aluminium profile with magnetic strip
Items with this symbol have a minimalist integrated magnetic strip made of high-quality metal. It emphasises aesthetics and elegance and allows easy maintenance as well as precise adjustment of the shower enclosure.

Magnetic edge without visible magnetic strip
Items with this symbol have a magnetic strip invisibly integrated into the profile. The captivating look eliminates a dirty edge and takes ease of care to a new level.

Magnetized, quick-release panels
Articles marked with this icon feature sliding panels fitted with power magnets and a quick-release mechanism.

Releasable sliding panels
Shower enclosures with releasable sliding panels are marked with this icon. The advantage for you: easy cleaning, even between the panels!

Ball-bearing rollers
Articles marked with this icon are fitted with sliding panels with height-adjustable, ball-bearing rollers.

Runners
Articles marked with this icon feature sliding panels with height-adjustable runners.

Infinite adjustment wheel
The entire door can be adjusted within the preset range by means of a fine thread wheel.

Wall compensation through adjustable safety glass
The wall compensation of 25 mm at the side and fixed panels are guaranteed by the "inner wall profile infinitely adjustable tempered glass."

Telescopic screw wall compensation
The entire door can be easily adjusted within the pre-set range by means of a telescopic screw.

"girofix" frame profile installation
The models marked with this icon feature a special "girofix-screw" to connect the profile to the wall.

Quick-release sliding panels
Shower enclosures with this icon feature sliding doors which can be released and moved independently.

Seal system

3★

4-star

An exceptionally discreet, inconspicuous PVC seal strip is attached to the base of the glass. The inner deflector and the soft, downward-angled flaps guide the water in the right direction. Can be removed easily and quickly for cleaning or replacement!

4★

4-star

An exceptionally discreet aluminium profile is fitted to the base of the glass together with a PVC seal insert – practically invisible, and outstandingly efficient. The water-repellent inner deflector and soft, downward-angled flaps keep the water firmly in check. The seal strip can be removed extremely quickly and easily for cleaning or replacement!

5★

5-star

Maximum innovation and practicality, day after day! The discreet aluminium profile is UV-bonded flush to the base of the glass with no protrusion, cutting potential dirt residue to a minimum. The PVC seal insert (similarly, with no protrusion) features an inner deflector and soft, downward-angled PVC flaps. Barely visible, and timelessly beautiful, they offer outstanding performance and can be removed with the greatest of ease for cleaning or replacement if required!

Standard seal
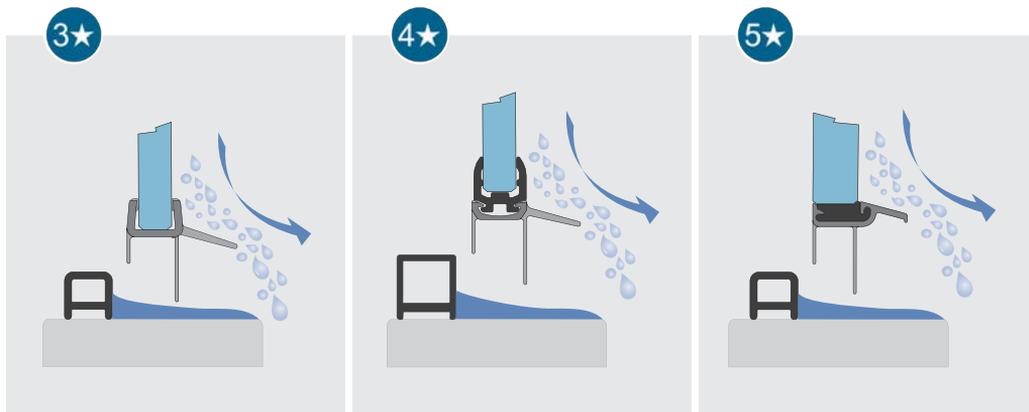

Special seal
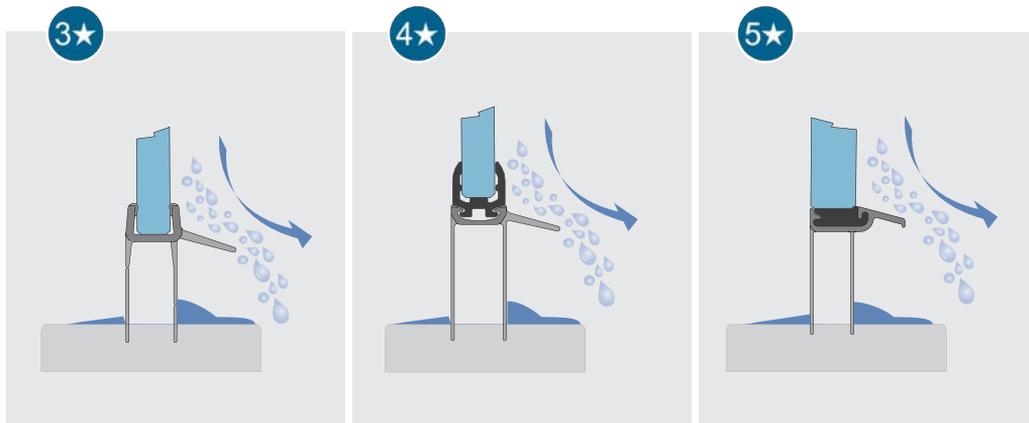

Please note! This seal can be applied as an alternative to the standard seal provided. Please also note that shower enclosures fitted with standard seal and integrated protection strip have been certified to EN 14428. Any alterations to this configuration may lead to reduced leakage protection!

1 Note „silk-screen print upper edge glass": These glasses have a serigraphie on the top end of the glass with a height of about 55 mm. Using this serigraphie, the rails and the adaptors are largely hidden.

2 Colour deviation of the screen print:
Due to the nature of satin screen printing ink, the colour of this glass may vary slightly from the image.

3 Height differences:
Please note that height alterations of up to 3mm may occur in multi-panel models due to the complexity of ceramic silkscreen printing in single-item production.

ProCare ✕

Protect ●

Glass processing

ProCare: Duka now offers a refined glass under the name "ProCare". The refinement is achieved by equipping the glass surface with a special coating. This is produced via an innovative magnetron process in which a metal oxide coating is applied to the glass under vacuum. Since the coating is activated via a tempering process, it remains permanently on the surface and unfolds its effectiveness there. ProCare is available for many articles - as an alternative to the proven Protect coating.

Protect: On request, duka shower enclosures are also available with PROTECT safety glass surface protection which guarantees high standards when it comes to use, clarity, transparency and cleanliness. Important: Do not use any abrasive cleaners or alkaline cleaning material.

Available in the following series:

Service

dukafix

NEW ADHESIVE TECHNOLOGY

Duka introduces dukafix, the new installation technology for wall profiles with two-component adhesive. The new „invisible system" has been developed to respect the essential design, lightness of form and high functionality and, above all, to make installation even easier. What characterises Duka shower enclosures is the ease of installation, which is now even better with dukafix. Available for: **multi-S 4000 new, libero 4000 and natura 4000.**

- wall mounting without dirt and noise
- no time-consuming drilling on hard wall tiles
- no risk of breakage
- no damage to sealing and pipes
- quick completion thanks to short drying times
- easy mounting and dismounting – ideal for rented flats or renovations
- unique lateral adjustment of +/- 2 mm

The kit and the mounting procedure have been designed with „ease of installation" in mind – a unique solution on the market!

Duka Digital

Duka Digital

SMARTER.BETTER.FASTER.

Discover the future of configuration and taking Measurements!

Duka Digital, the new digital platform from Duka, makes taking measure quicker and easier than ever before. With just a few clicks, the required measurements can be entered intuitively using self-explanatory templates - and in the shortest time! This saves valuable time and reduces possible errors to a minimum.
A configurator is also available. It presents all the products in their most varied forms with an impressive 3D representation. This gives you the possibility colours, glasses, handles and much more in order to put together your shower enclosure entirely according to your wishes.
Whether for private use, for professional use in the showroom or on the building site - with Duka Digital you are perfectly equipped and have a wide range of options to create your dream shower enclosure.
Be inspired by the future of taking measure and discover the advantages of Duka Digital!

QR-code

Every Duka shower enclosure is a beautiful addition to any bathroom that will bring you joy for years to come. If you ever have any questions about your Duka shower enclosure, you will find a **QR code** on the lower outer edge of your Duka shower enclosure. This Code includes an 8-digit number, with which we can identify your product immediately. The QR-code can be read with your smartphone or you can forward the 8-digit number to the retailer where you bought your Duka shower enclosure. Read more about it at **duka.it.** Your Duka "identity card," or ID number, can be found on the back of the guarantee which is delivered together with the product, or on the label of the packaging.

duka

Duka Warranty

With your Duka shower enclosure you will receive a comprehensive guarantee on the product. This is explained in the guarantee document which we enclose in the product packaging. On the rear of this certificate you will find an identification number ("ID"). Your "duka" ID allows us to track the progress of the shower enclosure at the factory at any time - from order to delivery. The guarantee includes a 5 year warranty for the client and a 10-year availability guarantee for spare parts. Read more on our website **www.duka.it.**

5 YEAR GUARANTEE
10 YEAR AVAILABILITY GUARANTEE

For technical reasons, the colours shown may differ from actual colours. Duka AG reserves the right to change its products without obligation of notification or replacement at any time.
